<b>MEDICAL HISTORY:</b>		
<b>MEDICATIONS</b>	<b>ALLERGIES</b>	<b>BLOOD TYPE</b>

**About vascular Ehlers-Danlos Syndrome (vEDS)**  
vEDS is a rare collagen disorder that can lead to life-threatening events, such as:

- Aneurysms
- Arterial ruptures or tears
- Bowel perforations
- Organ ruptures

vEDS weakens connective tissue, so physicians must be cautioned to take great care to avoid causing further harm. Nonessential surgeries should be avoided.
